RETROGRAMME "Feed"

Digipak 2xCD Album & Digital Album

RETROGRAMME (U.S.A.)

The Washington DC-based band Retrogramme possess the rare ability to surprise us. Always. Whenever they unleash their creativity we have to wait for a result far above our expectations. The antecedent album "For Our Dearly Departed" of 2012 is still considered as an object of cult, but the new double full-length "Feed" promises to go further. The band's style is a unique, multiform and sophisticated blend of synthpop, IDM, EBM and darkwave, created through asymmetrical or linear rhythms, alienating consonances and sound abstractions that make Retrogramme one of the most important institutions of their music genre.

The new title track enumerates twenty-four songs divided into two separate volumes: each of them is hyper saturated with original sonorities that will drag you into a vortex of dance. The elements to solicit your interest are all there: pulsing bass-lines of drum-programming, robotic or lithe musicality, fascinating and amazing vocalizations. Moreover, the second disk includes exclusively a fantastic series of remixes elaborated by Halo Effect, Framework, DrMOIIE, Citizen 16, Bites, Echoknocks, PDR, Poject K-11, Deadliner, Atropine, TourdeForce and Red This Ever. We welcome with true excitement the new Retrogramme and their "Feed", an album that we can define by only one, specific adjective: great.

Artist: Retrogramme
Title: Feed
Label: Space Race Records
Catalog #: SRRCD013
UPC Code: 8051773120688
Release Date: 20/03/2015
