PARA/NORMAL (MEXICO)

After having made crazy thousands international estimators of technological music scene by their previous album "Evidence Is Everything", the Mexicans Para Normal add another sensational masterpiece to their discography with the new full-length entitled "**The Cold Room**", strongly sure to get even higher awards in terms of artistic prestige, increasing the number of fans.

Eleven powerful songs are just waiting to surprise you with high dosages of danceable energy, combining a whole of electronica, synthpop, darkwave and EBM that will captivate you entirely: shadowy, futuristic melodies, pulsing-symmetrical percussiveness and harmonious flow of synths, form the sound structure of the tracklist. Mixed and mastered by the legendary Claus Larsen, aka Leæther Strip, the release offers sonic performances of great professionalism that enrich superbly the playlist of alternative D.J.'s, satisfying fully even the most exigent devotees of the electro genre. Polarizing sonorities, suggestive vocal formulas, super-dancing rhythms: from this moment everything is ready to astonish you!
