**MONSTERGOD** (POLAND)

Electro-dark and industrial rock at its best: here is the most suitable definition to describe the music of the Polish project **Monstergod**.

Their ardently desired reappearance represents an unmissable opportunity to know how fervent is the creativity of this power-duo, through the twelve songs included in the new album **Invictus**. All track-list is a miracle of sonic technology, in a succession of extraordinary sensations and super electronic magnetism generated by attractive vocals and by a set of advanced instruments. Synthetic and predominantly midtempo drumming, sequenced segments, cold keyboards, hard, obscure vocals and, occasionally, distorted guitars, fill the sound of an immersive melodism that will amaze you. The style of Monstergod, full of authenticity and technical perfection, denotes the impressive creative verve that resides within the two protagonists, who are able to know how to systematically mesmerize the listener in each of their songs.

"Invictus" is a great full-length, created with meticulousness and with the absolute certainty that it will reach its goal: enter your minds and stay in them for a very long time. This is music for authentic natural born electro fans!
